SUMMARY

Associate Software Engineer with 1.5+ years of experience at Gen Digital (Norton, LifeLock, Avast, Avira), delivering licensing, onboarding, and activation flows across Android, iOS, Windows, and Mac.

Proficient in React, Angular, .NET, Web Development and REST APIs, with strong end-to-end debugging across native and embedded clients. Skilled in AI-assisted development with GitHub Copilot, Cursor, ChatGPT, and Claude, and in building MCP-based developer tools to accelerate triage and root-cause analysis.

WORK EXPERIENCE

Gen Digital (Norton, LifeLock, Avast, Avira)

Jul 2025 – Present

Associate Software Engineer – Cloud Connect

Chennai, Tamil Nadu

- Built and maintained Cloud Connect licensing services across **Norton, Avast, and Avira** and partner/whitelabel brands on Android, iOS, Windows, and Mac, ensuring reliable sign-in, activation, renewal, and seat-transfer behaviour for global rollouts.
- Led the onboarding of **Avast Mobile Security** and **Avast AntiTrack** on Windows and Mac, enabling Avast clients to activate end users while providing continuous integration support and resolving release-blocking defects.
- Owned onboarding and defect analysis for flagship products – **Gen Utilities, Gen Driver Updater, and Gen Password Manager** – across desktop and mobile platforms.
- Developed **FinClaw -AI-based Gen Financial Assistant** within Norton's **Neo browser** extension that surfaces real-time financial alerts before payments, leveraging the user's spending patterns and live financial data.
- Built a POC level **AI-based defect analyzer**, deployed as an AWS Lambda function, that auto-generates first-level analysis on Jira tickets to accelerate triage.
- Built a **Sumo Logic log analyzer MCP** in **Cursor** that programmatically fetches, filters, and reasons over logs to surface likely root causes, significantly reducing manual triage effort.

Gen Digital (Norton, LifeLock, Avast, Avira)

Jan 2025 – Jul 2025

Software Engineer Intern – Cloud Connect

Chennai, Tamil Nadu

- Onboarded onto Cloud Connect (CCT) **licensing** and **activation** flows across Norton, Avast, and partner brands, contributing to **defect analysis** and fixes from the early weeks of the internship.
- Authored and stabilized automation tests and validation suites for licensing flows, improving regression coverage.
- Adopted AI coding assistants (**GitHub Copilot, Cursor, ChatGPT**) early to accelerate code iteration, test generation, and debugging across licensing and onboarding flows.
- Built a **RAG-based** conversational chatbot on AWS using **Bedrock KB** over S3-indexed Norton documents and **Claude 3 Sonnet** for grounded answers, designed to execute a **RAGAS**-based evaluation framework (Context Precision/Recall, Faithfulness, Factual Correctness, Semantic Similarity, Noise Sensitivity) over multi-turn conversational test sets to measure answer quality and surface retrieval improvements.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Java, Python, C, C++, SQL
Frontend: React, Angular, HTML5, CSS3, Bootstrap
Backend: .NET Core Web API, Node.js, Express.js, RESTful APIs
Databases: SQL Server, MySQL, MongoDB
Tools: Git, GitHub, Visual Studio, VS Code, Cursor, Postman, Jira, Sumo Logic, DataDog, TeamCity, Azure DevOps, AWS
AI / ML: GitHub Copilot, Cursor, ChatGPT, Claude, MCP (Model Context Protocol) tooling, RAG pipelines, RAGAS evaluation, prompt engineering

EDUCATION

Anna University – MIT Campus <i>B.E., Computer Science and Engineering CGPA: 8.5/10</i>	Oct 2021 – May 2025 Chennai, Tamil Nadu
Beula Matric Higher Secondary School <i>Higher Secondary Certificate (HSC) Percentage: 98%</i>	Jun 2020 – Mar 2021 Tamil Nadu

ACHIEVEMENTS

Published Research Paper –
“CardioNetFusion: A Deep Learning and Explainable AI Integrated System for Cardiovascular Disease Detection”, **IEEE International Conference on Data Mining Workshops (ICDMW)** 2024, Abu Dhabi, UAE; co-authored as a Research Fellow at **NGN Lab, MIT Campus, Anna University**.

Winner – Neo Claw Hackathon, Gen Digital (2026).

Presenter – Gen AI Expo 2026, Gen Digital, on automated first-level AI analysis for Jira tickets.

Finalist – National-level Hackathon Hack2TechSustain (2024).

Runner-up – SpiderBoy Web Development Contest (2023).

Competitive Programming – Solved 300+ problems on LeetCode.

ADDITIONAL INFORMATION

AI Tools: AI-assisted development with Cursor, GitHub Copilot, ChatGPT, and Claude; MCP (Model Context Protocol) tooling and prompt engineering for developer productivity.

Languages: English, Tamil.
